(74) Representative: Johnston, Kenneth Graham et al  
Lucent Technologies (UK) Ltd, 5 Mornington  
Road  
Woodford Green Essex, IG8 OTU (GB)

(54) **Telephone caller identification log with internet access**

(57) A method for storing caller identification information as a log of answered and unanswered telephone calls at a central server. This call log server is accessible by the internet, so if a subscriber is traveling, he or she is still able to access and read a list of answered and unanswered calls to the subscriber's home station. Internet devices such as browsers that are internet teleph-

ony capable may return a call from the call log list using a point and click sequence. The call log may be processed from natural chronological order into a personal priority order such as: family, professional and everything else. This call log may also be forwarded via e-mail to the subscriber. Such e-mail forwarding may be either contemporaneously with call logging or periodically.
